### **DETAILED ACTION**

In response to the Request for Continued Examination (RCE) under 37 CFR 1.114 filed on 11/30/09. Claims 1-2, 6-7, 10, 12-13, 15-17, 20, 26-27, 32-33, 35-37, and 40-44 have been amended and no new claims have been added. Claims 1-44 are pending in the instant application.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The following is a verbatim of the applicant's new claim 71 but the underlining of the limitations was not necessary as it is not an amendment to an existing claim.

Claim 1, line 11, replace "displaying the initial balance of winnings which can by won by the player" with - - displaying the initial balance of winnings which can be won by the player- -.

Claim 20, line 10, replace "displaying the initial balance of winnings which can by won by the player" with - - displaying the initial balance of winnings which can be won by the player- -.

Authorization for this examiner's amendment was given in a telephone interview with Adam Masia (Reg. No. 35,602) on December 19, 2009.

***Allowable Subject Matter***

Art Unit: 3714

1. Claims 1-44 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The claims of the instant invention are directed towards a method of operating a gaming system where a wager for initiating a game play that comprises a predetermined number of rounds where a wager pre-pays for the predetermined number of rounds. The method calls for a prior initial balance of winnings which is greater than the amount of the wager to be displayed "prior to displaying any outcome for any of the predetermined number of rounds, displaying the initial balance of winnings which can be won by the player for the game play". Additionally, the claims are directed towards determining a number of outcomes that adjust the initial balance of winnings based on the determined outcomes thereby determining a current balance of winnings where when a predetermined number of rounds have been completed the final balance of winnings based on the current balance of winnings is provided to the player.
4. The closest prior art of record found in Webb, Feinberg and Baerlocher do not alone or in combination fairly teach or suggest all elements of the claimed invention. As specified by the applicant's remarks filed on 11/30/2009. Webb does not anticipate or render obvious prior to displaying any outcome for a predetermined of rounds an initial balance that can potentially be won by the player and adjusting that initial balance based upon the game play of at least one of the determined outcomes. Feinberg does not cure such deficiencies but does teach the feature of providing one fee for a multiple number of plays of a basic game. Baerlocher fails to cure the deficiency of adjusting the initial balance of winnings based upon the outcomes that occur in the basic game of a

Art Unit: 3714

game machine. Thus the instant claim are not rendered obvious by the prior art of record and are thus allowable for the reasons listed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
